DEPARTMENT OF MOLECULARBIOLOGY - WHOLE BLOOD (EDTA)

HLA - B27 - PCR
(Method: Multiplex PCR)

Specimen	EDTA Blood		
HLA - B27	NOT DETECTED		

REMARKS

HLA-B27 is strongly correlated with ankylosing spondylitis, 90% of the patients with rheumatic disease have HLA-B27 compared with 10% of healthy controls. Other diseases associated with HLA-B27 are Reiter's syndrome, acute anterior uveitis and reactive arthritis following bowel infections with Yersinia, Salmonella or Shigella.
